At NOSHOK, we pride ourselves on being innovators in the industry by continually offering the latest technology and measurement solutions, and providing the best customer support in the marketplace.

Established in 1967, NOSHOK was one of the first companies to offer liquid filled pressure gauges. We also took a bold step by backing our quality gauges with an extended 3-year warranty. That unwavering standard of quality has endured for over 50 years, and as we have expanded our product offering we continue to provide industry-leading warranties. NOSHOK also leads the industry as one of the first companies to offer corrosion-resistant zinc nickel plating standard on our carbon Steel valves.

We have the capacity to put together special requirements which are so often hard to find. If you do not find what you need in this catalog, chances are we can still put a solution together.

NOSHOK is committed to providing excellence on every level. Thank you for choosing NOSHOK products.

PIGTAIL STEAM SYPHONS

PIGTAIL STEAM SYPHONS protect the instrument from the damaging effects of high temperature steam and should be used in all steam applications. They are available in 1/4" and 1/2" NPT sizes in welded Steel, welded 316 Stainless Steel or seamless 316 Stainless Steel with ratings to 3800 psi @ 850 °F.

PISTON TYPE SNUBBERS

PISTON TYPE SNUBBERS resist clogging and are self-cleaning. Five different sized pistons are included with each snubber to insure the correct amount of snubbing for virtually every application. They are available in Brass and 316 Stainless Steel in either 1/4" NPT, 1/2" NPT or 7/16-20 SAE-4.

WARRANTY: One Year†

SWIVEL ADAPTOR

SINTERED SNUBBERS are a cost-effective solution to protect expensive instrumentation. These snubbers increase gauge readability by smoothing out pressure surges, pulsations and spikes, and they eliminate instrument failure due to pressure shock. Five basic discs are available to accommodate 90% of applications. Snubbing action is achieved by utilizing a corrosion-resistant 316 Stainless Steel sintered element; exotic materials or intermediate disc grades are available on a per order basis. NOSHOK Sintered Snubbers provide long service life with no moving parts to wear out.

SWIVEL ADAPTORS are used with gauges and gauge valves to adjust the line of sight. The swivel adaptor rotates 360° to allow the connected instrument to be positioned in the desired direction and has temperature ratings of 15,000 psi @ 200 °F and 3,000 psi @ 1,000 °F. The pressure connection is achieved with a tapered cone style compression fitting simply by tightening the swivel hex nut. They feature all 316 Stainless Steel construction, and are standard with 1/2" NPT male process - 1/2" NPT female instrument connections. Also available with 1/4" NPT connections.

PANEL MOUNTING

Many panel mounting options are available and can be installed in the field. Options include polished Brass front flanges (BFF), black painted Steel front flanges (BLFF), chrome front flanges (CFF), polished Stainless Steel front flanges (SSFF), chrome triangular bezel front flanges with U-clamp (CBU), black painted Steel triangular bezels with U-clamp (BBU-clamp), polished Stainless Steel narrow bezel front flanges (SSBU), and panel mount clamps (PMC). Chrome-plated Steel adapter rings (AR) are available in conjunction with several of these flanges to adapt to oversized panel cut outs. A selection of flange rings are also offered: polished Stainless Steel flange rings (SSFR), chrome plated Steel flange rings (CFR), and black or chrome panel mount rings (BPMR & CPMR). Brass rear flanges (BRF) and black rear flanges (BLRF) for front of panel mounting are also available on some models. Rear Flanges are a factory installed option.

CASES AND COVER RINGS

Black painted Steel (BCR), chrome plated Steel (CCR) and 304 Stainless Steel (SSCR) cases and cover rings are available on many models as production options.

LENSES

Instrument glass lenses, laminated safety glass lenses, acrylic lenses, and homalite lenses (resistant to many industrial solvents) are available on many models. NOTE: A Steel or Stainless Steel case and cover ring is required when other than acrylic lenses are utilized. Some models are also available with a solid front, safety case configuration as a production option.

MAXIMUM INDICATING POINTERS (MIP) are an invaluable tool for identifying pressure spikes in a system. They are very helpful during system start up and trouble shooting. MIPs add an additional $\pm 1\%$ error to the gauge because of the increased load on the Bourdon tube. On ranges of 60 psi and lower, MIPs may double the allowed error of the gauge.

SET POINTERS (SP) are used to identify an operating minimum or maximum pressure or vacuum value. Set pointers are available on most 100 Series gauges.

RUBBER CASE PROTECTORS (RCP)

Rubber case protectors (RCP) are ideal for gauges that are subjected to direct physical shock. 2-1/2" covers are blue and 4" covers are black.

ORIFICES

Press-fit Brass orifices or threaded 316 Stainless Steel orifices are available on all NOSHOK pressure gauges. They are standard with .012" I.D or .032" I.D, depending on the model. Orifices are used in a gauge to restrict the flow of rapidly increasing and decreasing pressures, thereby lessening the immediate effect of pulsations and pressure spikes. Orifices are recommended for all dynamic applications.

RECALIBRATORS

The option of an adjustment screw accessible through the dial facilitates re-setting the zero point without disassembling the gauge.

OVER PRESSURE PROTECTION

Over pressure protection of up to 200% of the dial range is available on some models as a production option.

AMMONIA REFRIGERATION GAUGES

Ammonia refrigeration gauges with dials reading in both pressure and temperature are available in 400/500 Series 2-1/2" and 4" sizes.

LIQUID FILLING OPTIONS

Many NOSHOK gauges are available with liquid filling options. Our standard fill is Glycerin and water; however, optional fill liquids include Dow Corning® 200 silicone and Halocarbon®.

SPECIAL CONNECTIONS

Special connections are available on most NOSHOK gauges. Some examples include: metric threads, female threads, straight threads (flare or swivel type) and special o-ring connections. Please contact us with your requirements for prices, availability and minimum quantities.

PRESSURE GAUGES ACCESSORIES & OPTIONS

REID VAPOR TEST GAUGES

A Reid Vapor test gauge configuration which includes a handle, special dial and special pressure part is available in 600/700 Series gauges with pressure ranges of 0 psi-5 psi, 0 psi-15 psi and 0 psi-30 psi.

RECEIVER GAUGES

3-15 psi receiver gauges are available in both 600 Series (Brass) and 700 Series (316 Stainless Steel) configurations.

METRIC DIALS AND CUSTOMIZED SPECIAL DIALS

Dual scale metric dials in psi/bar, psi/kPa and psi/kg/cm² are available on many models. Certain other scales are available for specific sizes and ranges, such as single scale bar and kPa, refrigerant scales and altitude scales. Please consult the factory for availability. Special Dials such as non-standard metric scale, tons of ram, lbs. of force, etc. are available in small quantities (as few as one piece) on some models.

CERTIFIED CALIBRATION

Certified calibration is available on all NOSHOK gauges. Certified calibration provides the user with a serial numbered gauge along with a calibration sheet against a primary pressure standard and is traceable to the National Institute of Standards and Technology.

NOSHOK VAPOR ACTUATED REMOTE THERMOMETERS operate using a temperature actuated liquid in the sensing element and a highly accurate, high quality pressure gauge to indicate media temperature. As the media temperature increases the capillary fill fluid vaporizes, causing an increase of pressure within the Bourdon tube, and activates the movement and pointer for proper indication. Dial scale graduations are non linear, therefore, the highest degree of accuracy and readability is found in the upper half of the scale.

DIAL INDICATING THERMOMETER OPTIONS

ADJUSTABLE UNION CONNECTION

Can be used to reposition the dial face for better viewing. Also helpful when installing a thermometer where space is limited.

CERTIFIED CALIBRATION

Certified calibration is available on all NOSHOK thermometers, and provides the user with a serial numbered thermometer along with a calibration sheet against a primary temperature standard, which is traceable to the National Institute of Standards and Technology.

CONNECTIONS

In addition to our standard 1/2" NPT connection, 1/4" or 3/8" NPT and metric connections are also available. If a special connection is required, please consult the factory. Other options include a plain stem with an adjustable compression fitting, or left, right or top connections.

GLOW DIAL

Allows up close daylight and/or distant night time viewing. 5" Adjustable angle or back connected. Includes reflective pointer and two reflective clips included to indicate custom minimum and maximum limits.

LENSES

Laminated safety glass lenses are available on all 3" and 5" NOSHOK bimetal thermometers. Acrylic and polycarbonate lenses are available on all NOSHOK bimetal thermometers also, however they should not be used where case temperature exceeds 300 °F/150 °C.

MINIMUM OR MAXIMUM INDICATING POINTER

The MIP allows you to view your minimum or maximum temperatures for visual clarification of safe operation. Available only on 30-310 and 50-310 models.

MINIMUM AND MAXIMUM INDICATING POINTER

The MIP2 allows you to view your minimum and maximum temperatures for visual clarification of safe operation. Available only on 30-310 and 50-310 models.

MOUNTING FLANGES

Various sizes and types of mounting flanges are available.

SILICONE FILLED

All 2", 3" and 5" NOSHOK industrial bimetal thermometers are offered in a silicone filled version. This fill is used for applications where severe vibration may be a factor. Silicone dampens and lubricates the internal mechanism thus reducing pointer oscillation and premature wear. A polycarbonate lens is standard with a silicone filled thermometer. Maximum case temperature not to exceed 300 °F (150 °C).

SPECIAL DIALS

Special ranges and dials with company names, company logos, part numbers, telephone numbers, and custom layouts are available.

STEM TYPES

Multiple stem diameters, stem lengths up to 120", sharp tip options and optional 316SS wetted parts are available.

NOSHOK MINI BLOCK & BLEED 2-VALVE STATIC PRESSURE MANIFOLD VALVES combine isolating and venting in a single manifold eliminating the need for tubing and fittings. The block valve isolates the downstream process fluids and the bleed valve exhausts upstream fluids enabling static pressure transmitters, switches or gauges to be removed without disturbing the permanent piping installation. The valves are located on the top to fit into compact spaces and two holes are provided for mounting. Venting is to the left. The all 316 Stainless Steel blow out proof stem provides greater service life and a secondary stem seal in the full open position. The stem seal, with the FKM o-ring and PTFE back up ring, is below the threads and protects against galling and corrosion.

STABILIZED & NON-STABILIZED CONNECTORS

SPECIFICATIONS

MATERIALS: Zinc-nickel plated carbon Steel, 316 Stainless Steel
CONNECTION: 1/2" NPT-flange

Stabilized Connectors

Non-stabilized Connector

SZ SERIES

NOSHOK STABILIZED & NON-STABILIZED CONNECTORS are designed to reinforce the entire installation by shifting radial-stress load away from the NPT connections, and are available in 3-3/8" and 5" lengths.

SZ Series Stabilized & Non-Stabilized Connectors are available in zinc-nickel plated carbon Steel and 316 Stainless Steel, and feature slotted bolt holes that allow for 2-1/8" and 2-1/4" bolt spacings.

A single piece dielectric gasket (DK1) is available as an option to create a non-conductive shield between the process piping and the instrument. A two piece dielectric kit (DK2) is also available as an alternative when a separate sealing gasket or o-ring is required.

SPECIFICATIONS

MATERIALS: Zinc-nickel plated carbon Steel, 316 Stainless Steel
CONNECTION: 1/2" NPT-flange

Shown with flange adaptor for round installations.

SV SERIES

NOSHOK STABILIZED CONNECTORS WITH INTEGRAL VALVE are also designed to reinforce an installation by shifting radial-stress load away from the NPT connections, but also feature a block valve that can be installed on either side of stabilized body, allowing 1/2 turn installation.

SV Series Stabilized Connectors with Integral Valve are available in zinc-nickel plated carbon Steel and 316 Stainless Steel, and feature slotted bolt holes that allow for 2-1/8" and 2-1/4" bolt spacings. The integral valve has a 0.375" bore for unrestricted passage of process gas, and a standard non-rotating stem tip. This application will work on both flat surfaces (orifice fitting) and round surfaces (orifice flange) with flange adaptor.

A single piece dielectric gasket (DK1) is available as an option to create a non-conductive shield between the process piping and the instrument. A two piece dielectric kit (DK2) is also available as an alternative when a separate sealing gasket or o-ring is required. Stainless Steel bolts are also available.

All NOSHOK 316SS valve products meet the requirements of NACE MR0175/ISO 15156-3.

All NOSHOK valve products conform to the MSS SP-99 instrument valves standards, and valves supplied with packing also conform to MSS SP-132 compression packing systems for instrument valves standard.

50FA1 SERIES FUTBOLS

Futbols (flange adapters) bolt to the process side of a flange-flange manifold to allow connection of process flange taps or process root valves. Futbols also allow flanges to be connected to threaded process piping while maintaining the ease of removal or repair of the manifold if maintenance is required.

The futbols provide a 1/16" offset connection from the bolt holes to give connection centers of 2", 2-1/8", or 2-1/4"

SPECIFICATIONS

MATERIAL: Zinc-nickel plated Steel, 316 Stainless Steel

CONNECTIONS: 1/2" NPT

KIT INCLUDES : (2) Futbols, (4) hex bolts 7/16-20, (2) PTFE face seals

SA SERIES STATIC ADAPTORS

Static adaptors are used to join threaded ports to a flange style connection. They are often used to join the NPT port of a static transmitter with a flange mounted connection on a differential pressure to static adaptor plate. They are available in zinc-nickel plated Steel and electropolished Stainless Steel.

SPECIFICATIONS

MATERIAL: Zinc-nickel plated Steel, electropolished Stainless Steel,

CONNECTIONS: 1/2" NPT Male - flange, 1/2" NPT Female-flange

DIELECTRIC KITS

The dielectric kit is designed to maintain the integrity and reliability of the pipeline and piping system through safety and corrosion protection. Dielectric kits provide a non-conductive barrier between the process piping and the instrument and isolate components from the effects of electrical current. By eliminating metal-to-metal contact, current is halted to prevent corrosion and aid in the cathodic protection of the system.

DK1

- Single piece design combining a Delrin® sealing gasket and dielectric
- Bolts, washers and dielectric bushings are included with the kits
- Cannot be used in conjunction with seal rings or o-rings

DK2

- Used as an alternative to a one piece design when a separate sealing gasket or o-ring is required
- Two piece design consisting of a PTFE sealing gasket and PVC dielectric shim
- Bolts, washers and dielectric bushings are included with the kits

SPECIFICATIONS

MATERIAL: Delrin®, PVC

MAX OPERATING TEMP: 150° F (66° C)

DIELECTRIC STRENGTH: Exceeds 1/32 air arc gap approx 2,500 Vdc

DK2

All NOSHOK 316SS valve products meet the requirements of NACE MR0175/ISO 15156-3.

All NOSHOK valve products conform to the MSS SP-99 instrument valves standards, and valves supplied with packing also conform to MSS SP-132 compression packing systems for instrument valves standard.

MANIFOLD MOUNTING KIT

Designed for direct or remote mounting to a 2" pipe stand, can be utilized with any NOSHOK 2, 3 or 5 valve manifold by mounting a Steel or Stainless Steel bracket directly to the manifold body.

Δ PRESSURE TO STATIC ADAPTOR

Used in direct mount systems for gas pipelines, the pressure to static adaptor plate is used to mount a differential pressure transmitter and a static pressure transmitter to a five valve flange-flange manifold. They are available in zinc-nickel plated Steel or electropolished Stainless Steel. An integral mini style bleed valve is incorporated in the plate and a 1/4" NPT vent plug is provided. The mini style bleed valve is equipped with a FKM o-ring and PTFE back up ring below the stem threads to protect against corrosion and galling. Stem threads are rolled for greater strength and ease of operation and all NOSHOK valves are 100% helium leak tested for guaranteed reliability. Maximum pressure rating of 10,000 psi for Steel & Stainless Steel models.

Δ PRESSURE TO Δ PRESSURE ADAPTORS

NOSHOK differential pressure to differential pressure adaptors allow two differential pressure transmitters to be mounted on a single set of orifice taps. This configuration is ideal for applications such as bi-directional flow, and custody transfer where only a single set of orifice taps is available. Multiple adaptors are available for various application configurations and space restrictions.
